Before answering the question paper the candidate should ensure that they have been supplied the correct question paper. Complaints in this regard, if any, shall not be entertained after the examination.

Note: Attempt any five questions and all questions carry equal marks.

1. Briefly explain the ingredients of a typical Research Proposal. Assume a research problem of your choice and develop a tentative Research Proposal describing the essential parts of your proposal.

2. Describe the advantages and disadvantages of using a questionnaire for primary data collection. Indicate the practical situations in which a questionnaire should be preferred over the other tools of primary data collection.

4. Compare the following:
   (a) Sampling Vs Census.
   (b) Probability Sampling Vs Non-probability Sampling

5. Describe with examples different types of Tables. What are the important characteristics of a good statistical table?

6. Describe in detail the format (or layout) of a typical research report exemplifying the important parts of the report.
